Designing security

Welcome to ISAUnited.org, a Cybersecurity Professional and Standards Organization

ISAUnited.org is the premier professional membership organization dedicated to empowering security architecture designers, security-by-design practitioners, and security engineers worldwide. As the first and most influential network of its kind, we stand at the forefront of designing information security solutions to meet the evolving challenges of the digital age.

By joining ISAUnited, you are not just gaining access to resources; you are becoming part of a movement shaping the future of cybersecurity.

OUR MISSION

At ISAUnited, we advance security architecture through innovation, collaboration, and professional development. Our global network empowers security professionals with the skills, resources, and community they need to excel in designing secure digital environments.

"

Our Three Divisions

ISAUnited.org is built on three core divisions designed to support professionals in their unique practice fields. Whether you're focused on holistic design principles, technical engineering, or architectural strategy, we have a place for you:

01

Security by Design (SbD):

» Focused on embedding security at every stage of the development lifecycle.

» Offers guidance on creating secure frameworks, systems, and processes.

» Ideal for software designers, product managers, and project leaders.

02

Security Engineering (SE):

» Emphasizes building, implementing, and maintaining technical security solutions.

» Provides resources for tackling complex technical challenges.

» Tailored for engineers working hands-on with security tools and infrastructure.

03

Security Architecture (SA):

» Concentrates on high-level design and strategic planning of secure systems.

» Supports practitioners in aligning security goals with organizational objectives.

» Perfect for architects responsible for the broader vision and integration of security frameworks.

Each division is supported by targeted resources, certification programs, and collaborative opportunities tailored to your professional focus.

Why Join ISAUnited?

ISAUnited is more than a membership; it is a movement. By becoming part of our organization, you gain:

Exclusive Resources:
Access our vast library of templates, technical research, and best practices to enhance your skills.

Career Growth:
Participate in tailored training, certifications, and workshops designed to elevate your career.

Global Connections:
Network with industry leaders and peers through events and forums.

Influence:
Help shape industry standards and earn recognition as a leader in security architecture.

Join ISAUnited today and secure your future while shaping the digital landscape.

Membership Benefits

As an ISAUnited member, you receive immediate access to:

Technical Resources:
Practical tools and content to enhance your security designs.

Networking Opportunities:
Collaborate with a global network of professionals dedicated to secure design excellence.

Elevate Security Program:
Free training in security architecture and engineering for all members.

Recognize Your Expertise:
Elevate your professional standing and advance your career through ISAUnited.org's prestigious Technical Fellow Society.

Elevate Security Learning Program

The Elevate Security Program equips members with practical security-by-design principles to tackle emerging threats. This free member-exclusive program includes:

» Risk assessment techniques.
» Secure implementation strategies.
» Tools for embedding security into all design stages.

Elevate your expertise and defend the future of cybersecurity.

ISAUnited Certifications

Our certifications position you as a leader in security architecture and design:

Enterprise Security Architecture Professional (ESAP) Certification:

» Develop secure architectures using a comprehensive, accountable process.

» Align with industry best practices while enhancing your security posture.

Security by Design Professional (SbDP) Certification:

» Embed security at every stage of development.

» Equip enterprise teams with tools to create secure, resilient architectures.

Enterprise Cybersecurity Engineering Professional (ECEP) Certification.

» Design and implement comprehensive cybersecurity solutions using structured engineering methodologies.

» Analyze and mitigate threats, risks, and vulnerabilities in enterprise systems.

» Develop technical specifications for secure architectures and validate their functionality.

> **Certifications ensure you gain recognition in the growing field of security-by-design and prepare you for advanced roles in the industry.**

ISAUnited Technical Research Center

The ISAUnited Technical Research Center drives innovation in security architecture and design. Our mission includes:

» Advancing the field through groundbreaking research.

» Bridging the gap between theory and practical application.

» Addressing emerging challenges in AI-driven defenses, IoT, and 5G security.

> **As a member, you gain early access to research, tools, and methodologies developed in this state-of-the-art facility.**

The ISAUnited Digital Library

Our Digital Library is your gateway to cutting-edge resources, offering:

» Practitioner publications and technical reports.

» Best practices repositories are tailored for security architecture and engineering designers.

» Continuous updates to keep you ahead of emerging trends.

With these resources, members can stay informed, enhance their skills, and collaborate with a global community of security professionals.

Networking and Collaboration

ISAUnited fosters a collaborative environment where members can:

Engage in Forums:

Share insights with professionals who share your passion for secure design.

Participate in Events:

Connect with industry leaders and innovators at exclusive conferences and workshops.

Build Influence:

Shape the future of security architecture by contributing to standards and research.

ISAUnited Technical Fellow Society

The Technical Fellow Society recognizes the pinnacle of expertise and leadership in security architecture. As a Fellow, Senior Fellow, or Master Fellow, you will:

» Provide thought leadership for ISAUnited's technical initiatives.

» Shape and refine global cybersecurity standards.

» Mentor rising professionals and share your expertise through publications and speaking engagements.

Membership in the Technical Fellow Society elevates your influence and establishes your legacy in the field.

About our Community

Being a Part of Something Bigger ISAUnited equips you with the knowledge, tools, and connections to meet today's digital challenges head-on. Whether you are an experienced security architect or just starting your journey, we offer the resources and opportunities to help you succeed.
